

**METRONICS TECHNOLOGIES “WATERCUT MACHINES”
(Booth no. B5-013) technological innovations SIGEP 2019**

The company METRONICS TECHNOLOGIES, based in Spain, is manufacturing the **WATERCUT® machines** since 2003 (water jet machines for slicing pastries and chocolate decorations).

For SIGEP 2019, METRONICS TECHNOLOGIES will present our last technological innovation: **the WATERCUT® model LZ**. This new machine is a simplified version of our best seller machine (the highly reputed and reliable model called LX).

The new WATERCUT® LZ features remarkable cutting quality and accuracy, together with our powerful shapes programming software “P.P.C”. As a result of its simplified design, we can offer more affordable price, high reliability and minimal service costs.

This new machine will be a very interesting option for any pastry chef who is looking for flexible cutting solutions and optimized production methods.

Summarized features of our machine WATERCUT® LZ:

- Continuous single jet machine, static jet / moving tray
- Able to cut frozen or fresh products
- Useful cutting area 60 x 40 centimeters
- Maximum cake thickness 7.50 centimeters
- Water pressure 2,700 bar; pump integrated in the machine
- Overall dimensions: W 105/D 167/H 157 centimeters
- Touch screen 7”
- Electric supply 400 V, 3 phase. (rated power 7 kW)
- Machine manufactured under CE standards
